

This design created using the:

# Monogram Wizard **PLUS**

## Ad Design 003

1. We typed in the letter **B** into the **Letter 1 box** (it could have been entered in any of the initials or names places) and chose the font **Curly Q Script**.
2. We increased the size of the letter to **2"** using the **Letter Size control**.
3. The **Letter Width** was decreased to **55**.
4. The motif pak **Ornaments** was selected and the motif **Orn 5** was used.
5. Using the **Design Adjustments** control, the motif was positioned over the **B**.
6. **Layer 2** was selected and the letters **RR** were typed into the **Names box**. The font **Curly Q** was selected.
7. The **Letter Size** was increased to **1.5"**, the **Letter Width** decreased to **55**.
8. The **Kerning** was **decreased** to **-12**, and then the **Counter-Clockwise letter style**, , was applied to the letters.
9. The **up arrow** next to the **Counter-Clockwise letter style** was used until the letters were in the shape we desired, then the **Design Adjustments** arrows were used to position the letters.
10. Upon completion, parts of the letters overlapped, and since we wanted the **B** to sew on top of the **R**'s where they overlapped, the **Layer Swap** arrow was used to place the **B** on the second layer. This was done by selecting **layer one**, the clicking on the **right Layer Swap arrow**.
